First class clinical trials service

We established our on-site laboratory in 2002 – since then, our experienced pathologists have worked closely with our experts in clinical pharmacology on hundreds of clinical trials.

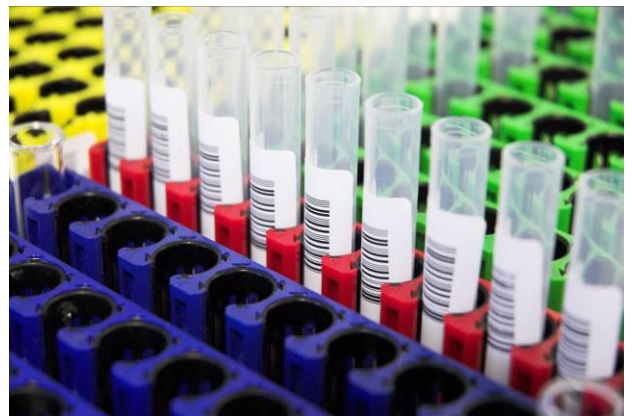

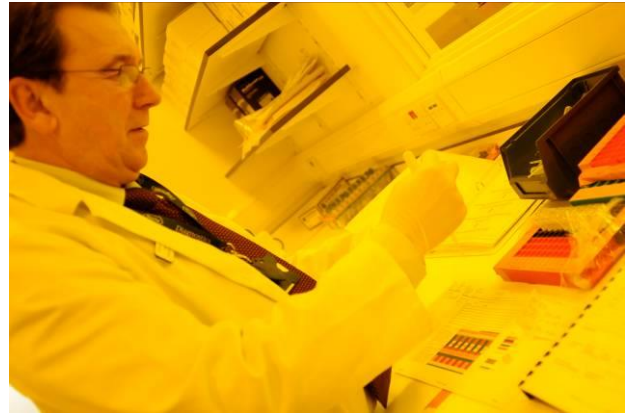

We offer:

- Total pathology project management, with a dedicated project leader
- Expert advice during protocol development & beyond
- Rapid set up
- Complete flexibility:
 - ✓ trial-specific kits, result flagging, alert limits & blinding of data
 - ✓ validation packages for new methods
 - ✓ interim & final electronic data to your specification
- Consistent methodology throughout your clinical trial
- Established reference ranges, based on a large population of healthy volunteers
- Full integration with our clinical service

Extensive test catalogue

- Wide range of safety pathology tests
- Expanding range of biomarkers, including:
 - ✓ Gastric
 - ✓ Lipid metabolism
 - ✓ Bone
 - ✓ Platelet function & coagulation
 - ✓ Renal
 - ✓ Diabetic
 - ✓ Cardiac
 - ✓ Reproductive
 - ✓ Inflammation/immunity

...and many more!

State-of-the-art facilities

- Pneumatic tube sample delivery from ward
- Robotic sample handling – centrifugation, level sensing, capping, aliquotting, labelling, sorting & storage
- Separate suites for light-sensitive samples and radioimmunoassay
- Secure sample storage – continuous temperature monitoring with integrated alarm
- Seamless LIMS, from sample collection to reporting

Specialist techniques

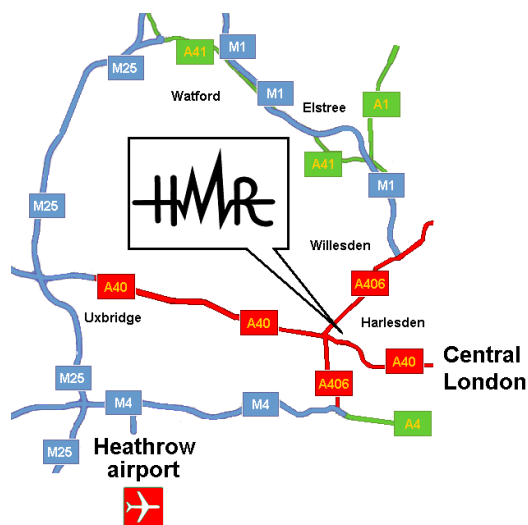

- Platelet function
- Cell stimulation and isolation
- Flow cytometry
- Radio-immunoassay and liquid scintillation counting

Quality assured

- Pathology accreditation
- Stringent quality assurance and regulatory standards
- External quality assurance schemes
- College of American Pathologists (CAP) accredited
- HPC-registered Biomedical Scientists
